**Edge View – 12° Rotation**

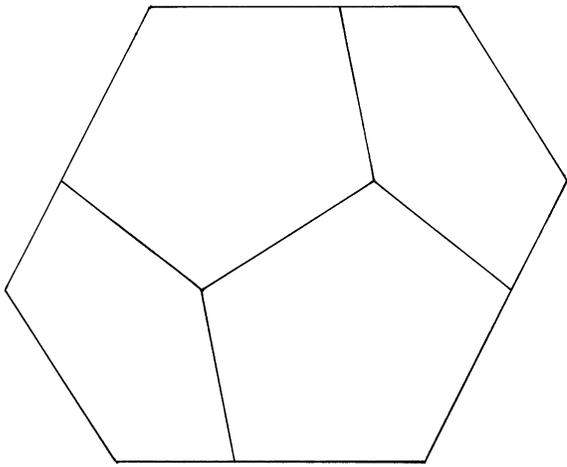

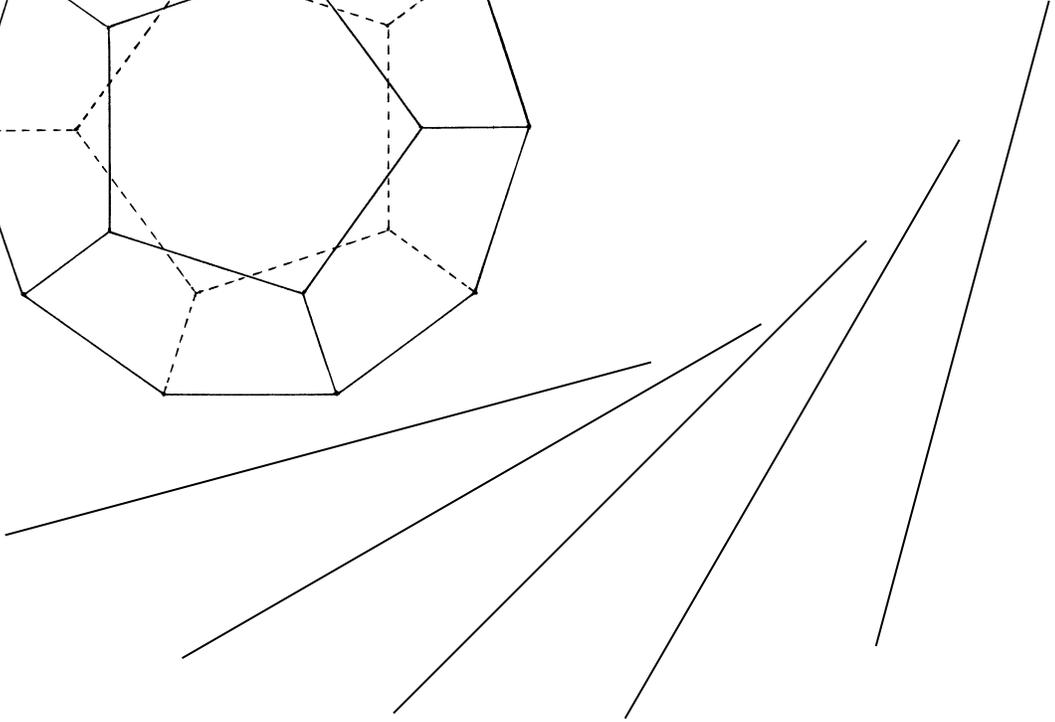

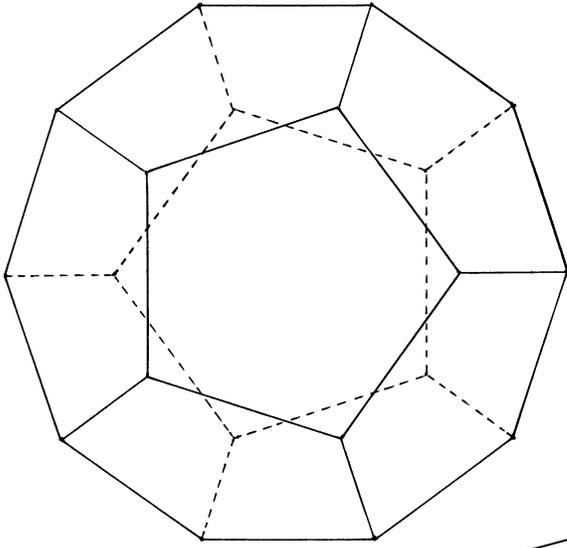

Descriptive Geometry  
**Edge View – Angle Undetermined**

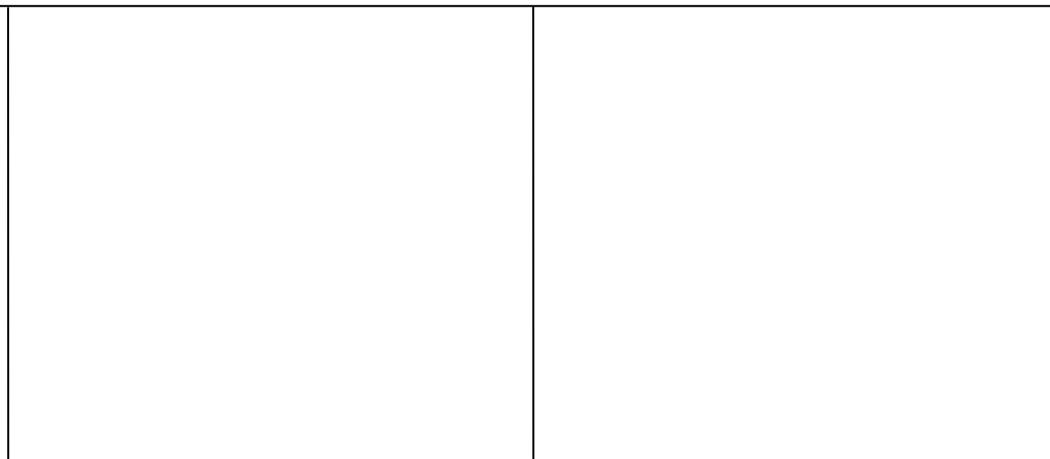

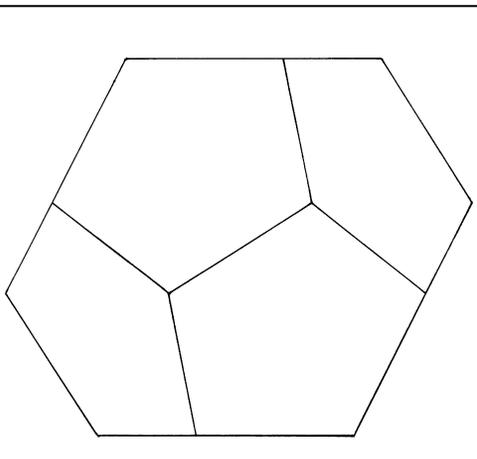

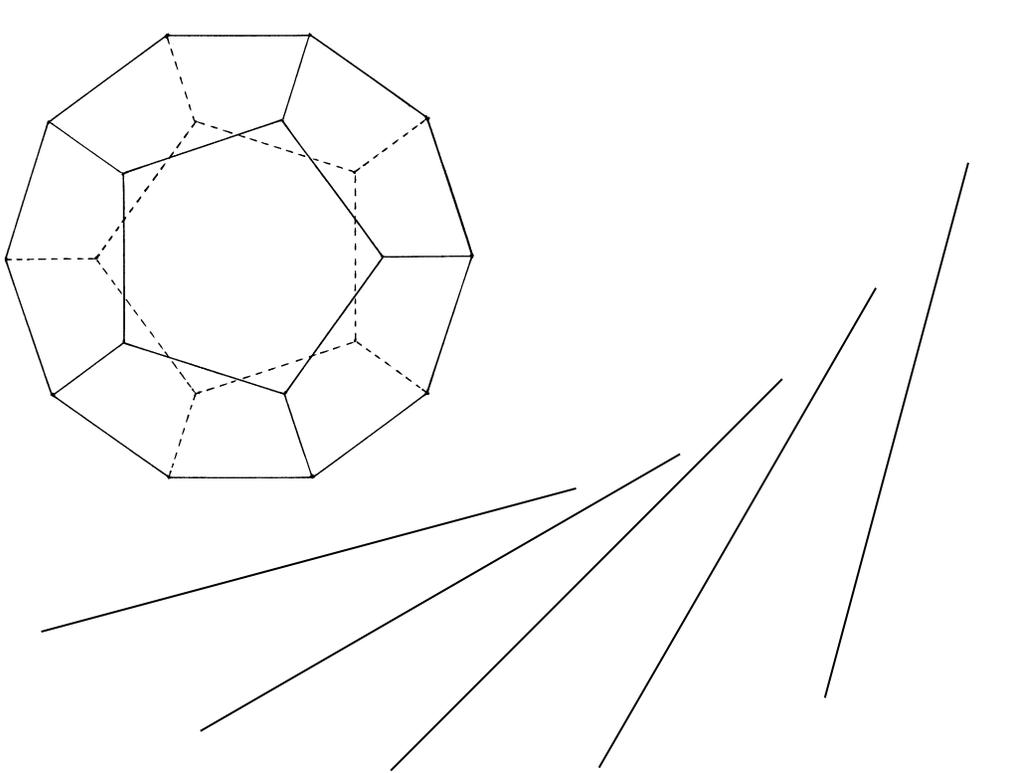

# Descriptive Geometry

## Edge View – Multiple Rotations

Instructions: From the top view, draw perpendicular lines to each of the angled lines, then copy these spacings onto the horizontal line. One extra sheet should be glued to the end, in order to form one extra long sheet of paper (8.5 by  $\approx 20$  inches).

# Descriptive Geometry

## Arbitrary Auxiliary View
